1. Establishment of the Supply Chain Policy and Its Practices in the Operational Processes

AGABULLION, to establish a strong corporate governance system;

- The FATF Recommendations
- OECD's Responsible Supply Chains of Minerals from Conflict-Affected and High- Risk Areas Compliance Guidance
- BIST's "**Responsible Precious Metals Supply Chain Compliance Guide**"
- UN Council Decisions
- European Union Decisions

AGABULLION Kıymetli Madenler A.Ş.
Responsible Gold Supply Chain Compliance Report (Continued)

- Adopted and implemented a company policy consistent with the regulations of the Turkish Financial Crimes Investigation Board (MASAK)

Risk-based due diligence was conducted and all supply chain processes were applied in line with the Responsible Supply Chain Management Policy, the controls and transactions were monitored, the risks were analysed and evaluated, the 'know your customer' principles were applied and finally a strong company management system was fully established.

2. Determination of the Risks in the Supply Chain and Implementation of the Strategies with a Risk-Based Approach

AGABULLION has been developed the Gold Supply Chain Policy and implemented in scope of BIST's "Responsible Precious Metals Supply Chain Compliance Guide". In this policy, intelligence information has been collected about potential customers against the risks identified under the heading "High Risk Criteria in the Gold Supply Chain"; besides, differentiated questionnaires and similar methods of collecting information have been applied to the companies which are engaged in individual, institutional, precious metals and other fields.

The intelligence studies conducted on the customers have been updated periodically and additional information documents have been requested in extraordinary circumstances. Managing these processes within the scope of Customer Relations have been systematized, compilation and recording of customer relations and all the interview notes, information and documents from the first interview of a customer to the current situation were recorded in the digital environment and a large amount of cumulative data was revealed. In this data, a reference account number (ID) is assigned for each customer / supplier and acceptance / rejection process as customer / supplier, systematic monitoring and analysis have been performed in the commercial processes following the acceptance.

The compliance officer regularly monitors, analyses, identifies and reports to the top management in spite of the risks identified under the heading "High Risk Criteria in the Gold Supply Chain". In the Company Policy, high risk incidents in the presence of risks or probabilities in the section entitled "High Risk Criteria in the Gold Supply Chain" are forwarded by the compliance officer to the Risk Committee for consideration.

The Risk Committee may refuse or accept the potential customer / supplier to work. Following the acceptance of the customer / supplier, due to the risks that may arise during the work process, a risk reduction plan to be managed by the compliance officer can be made and the results can be monitored, the trade can be suspended or terminated completely.

3. The Implementation of the "Know Your Customer" Principles

All relevant documentation concerning customers' / suppliers' interview notes, risk analyses and customer identification documents and other documents are tracked and filed under the customer's ID and copies are stored in safe internet Cloud environments.

With the system we have, transactions are monitored on a customer basis, and depending on the type of activity
